

## **BrightPOC: IEE Proof of Concept Service**

**Description:** This is a three day, onsite service designed to allow potential users of Infobright Enterprise Edition to rapidly but thoroughly evaluate the solution in a real-world environment.

Infobright will provide the following through the execution of this service:

- A consultant knowledgeable in data warehousing, and with deep understanding of the Infobright offering
- A preparation session to:
  - Provide an overview of the PoC process
  - Define PoC:
    - Objectives
    - Measurables
  - Clarify roles and responsibilities
  - Highlight client data gathering expectations
- Installation of the Infobright Enterprise Edition evaluation software on client's server
- Query review and validation
- Data review and initial load
- Query execution
- Compilation and review of results, including recommendations
- A final report outlining the results, and a two-hour presentation to review the findings

This service is based on a mutually agreed upon scope depending on the number of data elements, target tables, source files and number and complexity of queries.

**Benefits** that you can expect to receive from this service:

- A review of your current data and models along with recommendations for improvements
- Benchmark performance statistics for Infobright using your data:
  - Compression rates,
  - Data load speed,
  - Query performance
- Tips and best practices for improving query performance in Infobright
- Recommendations on how to implement Infobright in your environment.

**Fee**            \$7,500 plus T&L
